

Data Sheet

Billingshurst Surgery, West Sussex

Reside Construction Ltd were contracted to refurbish the whole of Billingshurst Surgery in West Sussex.

The works comprised the overhaul of all rooms within the surgery as well as the formation of five new consulting rooms, providing much needed expansion. Splitting the project works into five phases was essential for the success of the project as the Surgery had to remain operational during the whole of the construction process, so working alongside the practice and staff was essential.

Project highlights included installing a new lift where there was not one previously as well as the total refurbishment of the entrance and waiting areas, which took a tired and dysfunctional area and turned it into a high quality, welcoming space.

Despite the challenges presented by Covid-19, the project was completed in July 2020 and we wish the clinical professionals and staff the very best in their new facility.
